

# DIEGO RUSSO

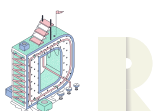

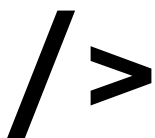

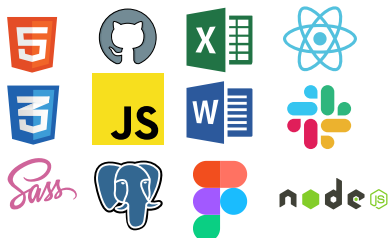

## JUNIOR SOFTWARE DEVELOPER

### >> PROFESSIONAL SUMMARY

I am a determined, hardworking, and self-motivated person. Eager to learn something new every day improving myself to be better than the day before. Being part of the School of Code has given me the technical skills foundations to pursue my career aspirations in the tech industry as a Full Stack Developer, now aspiring to further my growth in a professional environment. I believe that the soft skills I have developed as collaborative teamwork, decision making, fast adaptability from previous employment make me valuable addition to any team driven environment.

### / EXPERIENCE

#### >> Software Developer trainee Full Stack

School of Code | November 2021 - March 2022

At the school of code, I gained an understanding of the principles of software development, how to apply computational thinking, agile fundamentals in a collaborative development team as well as test driven development, problem solving and user experience when developing software. Learning different technologies beginning with HTML, CSS and JavaScript and then progressing with libraries such as React.js, as well as learning Node.js, Express.js and database with SQL and Heroku.

I have worked in different types of projects during my learning process, alone and within teams implementing methodologies such as Kanban, TDD, object oriented programming along with practices such as pair-programming.

#### >> Reloved-Project(Feb-March 2022)

In a team of 6 we created an app that will allow the user to exchange or give away unwanted goods to give them a second life and reduce waste. I was involved in and participated in the front end and in the back end, focusing in team work and implementing pair programming.

> Front end: React.js, CSS for the user experience and UI libraries such as Chakra.

> CI/CD, pull requests, merging of branches in Github, solving conflicts.

> Organized our day planning our sprints, daily stand-ups, retros and the end of each day and decision making as a group to achieve our goals and move the project forward. deployed front-end using Netlify.

> Back end : Node.js, Postgresql and Heroku for our data base as well as implementing Auth0 for user authentication.

> Worked in an agile environment we were able to deliver successfully within the time given.

> Daily team bonding activities to build up a better team working environment.

During this time working as part of the team I enjoy learning from each other, also how to not avoid conflict but how to resolve conflict between the team by addressing any issue on our daily retros, to take the best team driven decisions and work collaborative.

## >> PROJECTS

### >> Recipe Book App

Created this App that allows the user to search from 20 different recipes suggested by the ingredient typed in the input field that gets the information requested fetching from an external API. The tools I used JavaScript for functionality implementing the , CSS for styling and HTML.

### >> Manet Tribute Page

This is a tribute page in which the layout was built with HTML, styled the page using CSS including animations, grid for displaying information and implemented handlebars to create a page template to be able to display different information with the given data .

### >> Piano Keys

Learn how to play a song with this piano website, implemented DOM manipulation, function implementations and onclick events along with CSS styling.

### >> Tea shop page

This webpage was created using semantic HTML and CSS for styling and position objects shows good understanding of the page layout and how to place objects within the page.

## >> WORK EXPERIENCE

### /> Chef

Wildfire entertainment: Oblix Restaurant at the Shard– Zuma London | Aug 2019 – Oct 2021

Worked in a challenging environment under pressure, as part of a team of Chefs where I developed good teamwork, clear and concise communication, adaptability to work with different people and capability to learn new cuisines types developing new skills in a fast-paced and high pressure environment.

### /> Demi -Chef

Rock Grille, Red Rocks Amphitheatre, Colorado, USA| June-September 2018

Seasonal job to experience and travel abroad. I Worked along with an international team of chefs providing catering and a la carte service to an exclusive venue.

### /> Prep Chef/ Voluntary work

Glyndley Manor Hotel, Pevensey, E Sussex | August 2012- August 2013

Voluntary work, helped in many task to support a great project for the community that Ellevest Ministries offers helpings people to overcome many difficulties in their lives.
